REPORTS

MS4 PROGRAM REPORT – MS4 Coordinator J. Gadzala referenced and reviewed an email included in the board's packet for review. Active erosion and sediment control permit holders will need to apply to IDEM for a continuation of coverage under IDEM's new Construction Storm Water General Permit. The updates replace rule 5, taking existing requirements and adding additional criteria. There will be stricter rules for self-monitoring and reporting. Construction sites under this permit must keep measurements of deficiencies and responses in finding deficiencies. Section 3.9 also is updated regarding single family residences and ponds that are not part of a common plan of development or sale. This permit must be applied for if more than one acre is to be disturbed. Everyone who has a current permit was sent an email which includes new requirements. Next, Gadzala reported that the Town received notification that notice of intent from IDEM has not been released so this general MS4 permit not active yet. The Town will be going under old rule 13 for the time being. Lastly, Gadzala reported that Duneland Schools Special Services expansion project is now underway and will be added to
